

3 November 1975

OFFICE OF SECURITY DIRECTIVE NO. 75-19

FOR : All Office of Security Employees

SUBJECT : Contacts with State and Local
Police Organizations

RESCISSION: Office of Security Directive No. 73-10,
dated 14 August 1973

1. Congressional attention and public opinion continues to be focused on the extent of cooperation between this Agency and law enforcement organizations. In order to avoid any impression of Agency involvement in law enforcement activities, it continues to be necessary to limit our contact with such organizations.

2. Effective this date, any contact with state or local police departments and agencies, except for those related to the conduct of investigations associated with the security clearance processes, those involving assistance to Agency employees, i.e., "personnel security cases," and those initiated to protect Agency facilities and property, will require the prior approval of the Director or Deputy Director of Security in each case. Office of Security components will report to the Director or Deputy Director of Security any requests from local police organizations for assistance before taking any action in response to such requests. Further, with the exceptions noted, Office of Security components and personnel will not solicit the assistance of any state or local police organizations without the prior authorization of the Director or Deputy Director of Security in each case.

3. Except for contacts related to the conduct of investigations associated with the security clearance process, all police contacts will be reported in "contact report" format. A copy of all such memoranda will be sent to the Deputy Director of Security (PSI).
